

[Registration on ebay using an invalid email address is possible]

Priority: Low

Severity: Low

Environment: Chrome

Description:

It's possible to create an account on ebay using an invalid email address.

Performed actions:

Open the ebay website : **OK**

Click on register : **OK**

Enter a user first and last name : **OK**

Enter an invalid mail address ex: " tb@mail.com " : **OK**

Enter a password containing more than 6 characters : **OK**

Click on create account : **NOK**

Expected result:

An error message is displayed showing that the email address used is invalid.

Test result:

A new account is created and it's possible to sign in using that address.
